MANOJ BABU BALINENI

Senior Back-End Engineer

+91-9381439125 | balinenimanojsai@gmail.com | manoj-babu | Github.com | Leetcode.com | Manoj Babu CFG

*Back-End Engineer seeking roles in **Backend Application Development, Distributed Systems, and Platform Engineering**, leveraging expertise in Java/Python, microservices, API performance optimization, and scalable system design to deliver high-impact digital products.*

CORE COMPETENCIES

- Back-End Application Development
- REST API Engineering
- Microservices & Distributed Systems
- Java & Python Server-Side Development
- Event-Driven & Asynchronous Processing
- Database Design & Query Optimization
- API Performance & Reliability Engineering
- Secure Authentication & Authorization
- Automated Testing & Code Quality

EDUCATION

SRKR Engineering College B.Tech in Computer Science CGPA: 9.14/10 | May'22

Narayana Junior College Intermediate Percentage: 97.9 | April 2018

Sarada High School SSC CGPA: 9.5/10 | April 2016

TECHNICAL SKILLS

- **Languages:** Java, Python, C/C++, JavaScript
- **Frameworks:** Spring, Spring Boot, Spring Security, JUnit, Mockito
- **Databases:** MySQL, SQL
- **Messaging:** Apache Kafka, RabbitMQ
- **Tools:** Git, Jenkins, Postman, Jira, IntelliJ, VS Code

PERSONAL DETAILS

Date of Birth: 23rd January, 2000

Languages Known: English, Hindi & Telugu

Address: Hyderabad

PROFILE SUMMARY

- Back-End Engineer with **3.5 years of experience** delivering **high-scale, production-grade backend systems** for global airline platforms at **Tata Consultancy Services**.
- Proven expertise in **REST API engineering, microservices architecture, event-driven systems, and performance optimization**.
- Hands-on experience building secure, scalable services with **Spring Boot, Kafka, RabbitMQ, MySQL, AWS**, and strong quality discipline through **JUnit, Sonar, and CI automation**.
- Recognized for ownership, problem solving, cross-team collaboration, and consistent delivery of measurable business impact.

KEY ACHIEVEMENTS

- Recognized as Digital Profile (2022), leading to early promotion and 40% improvement in client metrics.
- Awarded Best Star Employee twice for consistent high performance.
- AWS Cloud Practitioner Certified.

WORK EXPERIENCE

Jun'22 – Present | Tata Consultancy Services (TCS) | Hyderabad
Back-End Developer
Client: Thai International Airways

Key Result Areas

- **API Design & User Enablement:** Designed and integrated social authentication (Google & Facebook), increasing new user registrations by **30% within one quarter**.
- **Core Back-end Integrations:** Implemented **Amadeus (1A) APIs** and third-party services supporting booking, check-in, payments, insurance, and manage-booking workflows.
- **Performance Engineering:** Led API optimization initiatives, reducing response times on high-traffic endpoints and significantly improving user experience.
- **Payload & Network Optimization:** Implemented **Composite API patterns** with selective fields, reducing payload size by **40%** and network calls by **50%**.
- **Secure Storage Services:** Integrated **AWS S3** for document management, improving retrieval speed by **30%** and storage efficiency by **25%**.
- **Notification Automation:** Implemented **AWS SES**, improving transactional email delivery rates by **40%**.
- **Feature Governance:** Introduced feature-flag-based rollouts, reducing production risk by **40%** and enabling instant rollback without redeployment.
- **Code Quality & Testing:** Built comprehensive **JUnit 5** test suites achieving **85%+ code coverage** and **70% mutation coverage**, meeting Sonar quality gates.
- **Observability & Error Handling:** Implemented **AOP-based logging and exception handling**, improving error traceability by **25%**.
- **CRM Integration:** Integrated **Salesforce APIs** for real-time profile sync and automated case creation, reducing support resolution time by **30%**.
- **Event-Driven Architecture:** Built Kafka and RabbitMQ-based microservices, reducing processing latency by **25%** and improving scalability by **30%**.
- **API Test Automation:** Designed Postman test suites integrated with CI pipelines, validating **100+ API scenarios** and reducing production defects by **30%**.
- **Deployment Automation:** Built Jenkins pipelines, reducing deployment time by **30%**.
- **Scalable Service Deployment:** Deployed Dockerized services on Kubernetes, enabling horizontal scaling and reducing downtime by **40%**.
- **API Gateway & Security:** Centralized routing and authentication using **Spring Cloud API Gateway**, reducing inter-service latency by **25%**.
- **Tech Stack:** Spring Boot, Java, MySQL, Kafka, RabbitMQ, JUnit 5, AWS, Jenkins, Docker, Kubernetes, ReactJS, Jira
